

Intercom solutions for secure waiting areas (refuge)

REFUGE range

READY-TO-USE, PACKAGED SOLUTIONS

REFUGE SECURITY INTERCOM SOLUTIONS

REFUGE packs are specially designed to meet the intercom needs of secure waiting areas (refuge areas) in public buildings.

This solution complies with the fire safety regulations that must be followed in public buildings and allows anyone in a secure waiting area to contact emergency teams in the event of a fire or any other event requiring the building to be evacuated.

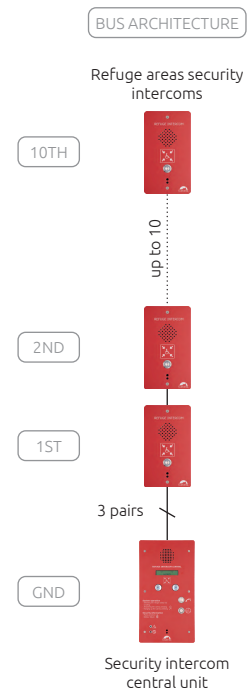

Solution benefits

- > Ready-to-use packaged solution (call station, security central unit, and back-up power)
- > Stations monitored from the central unit
- > Status indicator on the call stations
- > Complies with fire safety regulations for public buildings
- > Multiple packages available (depending on the number of secure waiting area call stations)

Packs

REFUGE PACK 1	1 REFUGE station with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8961
REFUGE PACK 2	2 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8962
REFUGE PACK 3	3 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8963
REFUGE PACK 4	4 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8964
REFUGE PACK 5	5 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8965
REFUGE PACK 6	6 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8966
REFUGE PACK 7	7 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8967
REFUGE PACK 8	8 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8968
REFUGE PACK 9	9 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8969
REFUGE PACK 10	10 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8970
REFUGE CENTRAL BELT	Belt option for safety intercom central unit surface mounting	440.8810
