

# Intercom solutions for secure waiting areas (refuge)

**REFUGE range**  
READY-TO-USE, PACKAGED SOLUTIONS

# REFUGE SECURITY INTERCOM SOLUTIONS

REFUGE packs are specially designed to meet the intercom needs of secure waiting areas (refuge areas) in public buildings.

This solution complies with the fire safety regulations that must be followed in public buildings and allows anyone in a secure waiting area to contact emergency teams in the event of a fire or any other event requiring the building to be evacuated.

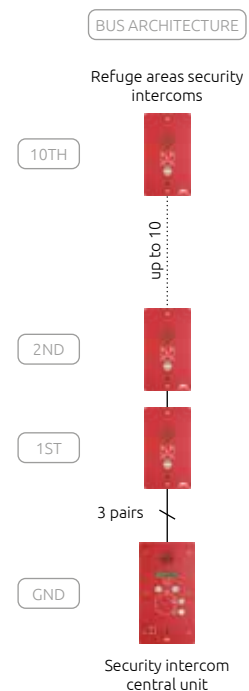

## Solution benefits

- > Ready-to-use packaged solution (call station, security central unit, and back-up power)
- > Stations monitored from the central unit
- > Status indicator on the call stations
- > Complies with fire safety regulations for public buildings
- > Multiple packages available (depending on the number of secure waiting area call stations)

## Packs

REFUGE PACK 1	1 REFUGE station with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8951
REFUGE PACK 2	2 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8952
REFUGE PACK 3	3 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8953
REFUGE PACK 4	4 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8954
REFUGE PACK 5	5 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8955
REFUGE PACK 6	6 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8956
REFUGE PACK 7	7 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8957
REFUGE PACK 8	8 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8958
REFUGE PACK 9	9 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8959
REFUGE PACK 10	10 REFUGE stations with 1 call button, Braille, status indicator, and induction loop output + 1 security intercom central unit with an LCD display and back-up power (batteries)	440.8960
REFUGE CENTRAL BELT	Belt option for safety intercom central unit surface mounting	440.8810
